EDIFICIO GRIS, 5º PLANTA

PINTOR BAEZA, 12 / 03010 ALICANTE / SPAIN

The scope of the research conducted by our group on Respiratory Diseases unfolds essentially in the clinical setting (diagnosis and treatment of respiratory diseases), although as it concerns departments with a vast experience in training at the undergraduate and graduate levels, it also comprehends the field of education. Furthermore, the research conducted by the group is geared towards the application of its results in society in the form of new therapeutic, diagnostic and/or preventive tools.

OBJECTIVES

- 1.** Improve the development of research in different areas in the field of respiratory diseases.
- 2.** Strengthen the human resources of the research group on Respiratory Diseases.
- 3.** Improve our connections to other research groups.

“Our research group comprehends eleven research areas.”

AREAS OF RESEARCH

- AREA 1.** Diseases of Pulmonary Circulation (PHT): Dr Joan Gil Carbonell.
- AREA 2.** Sleep disorders: Dr Eva María Rosillo Hernández, Dr Luis Hernández Blasco.
- AREA 3.** Pleural Pathology: Dr Cleofé Fernández Aracil.
- AREA 4.** Lung Tumours: Dr Concepción Martín Serrano.
- AREA 5.** Interstitial Lung Diseases: Dr Raquel García Sevilla.
- AREA 6.** Occupational Lung Diseases: Dr Encarnación Barroso Medel.
- AREA 7.** Management of Respiratory Failure: Dr Alfredo Candela Blanes.
- AREA 8.** Tobacco Use: Dr Santos Asensio Sánchez, Dr J.F. Pascual Lledo.
- AREA 9.** Minimally Invasive Thoracic Surgery: Dr Jorge Luis Cerezal Garrido.
- AREA 10.** Surgical Management of Neuroendocrine Tumours: Dr Juan José Mafe Madueño.
- AREA 11.** Surgical Management of Lung Metastases: Dr Benno Baschwitz.
